I am writing this to express my opinion on this topic. The way this was original done was wrong. This didn't need to be decided in a hurry. It should involve the public's opinion. Stop forcing Maine residents who oppose this opinion and let them make their choice. Same holds true for allowing people to vote for their candidate. The push that is being done while the democrats have power is absurd. They are taking away the rights of the opposing side and all this is doing is driving a stake right down the middle and making this country more divided than ever. I would be willing to bet if the money had been spent on hydrogen instead of solar energy we would be much further along. We are killing our land with solar farms, killing our ocean with wind power and killing the idea of an America that was all about freedom for the people by the people not by the legislators.
