Absolutely NO on the advanced clean Carroll rule for Maine. Maine government needs stay out of this one. When electric cars are perfected for our climate and reasonable cost and repair people on their own will choose these kinds of vehicles. Why not lobby the auto industry to build more efficient gas powered automobiles with less emissions? Aren't you stepping close to taking away the people's right to choose? Government has more important issues to regulate than requiring what type of automobile they are required to buy! This bill is costing the people millions when this money and your efforts could be directed to really make a difference. Let's get back to taking care of issues that are really going to help...DHS, roads and bridges repair and safety, quality medical care, nursing home shortages, teacher shortages, drug prices, wages, housing, gas and oil prices, electricity prices, gun regulations just to name a few.
