First Off , when did we become California and why does Maine need their Economy ruining policies. Do we not have the capability for ORIGINAL thought here in Maine? As usual we are relying on environmentalists and not asking experts in various fields. If The State had any real care in the environment they would have started discussing Nuclear Power> Instead we are becoming the land of tree killing Windmills and ground killing Sunscreens. The last time a “California Emission standards” came to Maine it was used in York and Cumberland Counties only pretty much and was a complete disaster as Proven By the PPH in 1994. It wouldn’t do a hill of beans anyway as it has been proven that a VAST MAJORITY of Contaminants were NOT ORIGINATED in Maine but from the Midwest, Though nowadays the Pacific winds are bring the pollutants from China and India.

Think before you proceed as it is NOT for the Common Good if it hurts People’s Pockets, Businesses, and OUR unique Farming, Tourist and Fishing Economies.
