The people of the state of Maine should NEVER be forced to use an electric vehicle. Electric vehicles are showing over and over again that they are expensive and a disaster. Maine and the USA is a free country. No politicians have the right to force anything on the people of this state or country. Remember what your jobs are. We the people DO NOT work for you, you work for us. Electric cars are not affective. Most families in Maine need to have two people working in order to pay their bills. No family will be able to afford two electric cars and how are you planning on having a grid that can charge that many cars in this state. Once again this is a joke and a waste of tax payers time and money. We the people have the right to choose what we buy and what we want for vehicles and NO ONE has the right to take away that choice.
