I am opposed to this rule. The electric energy system is in trouble in Maine because for the last 40 years, the politicians in Augusta failed to consider the needs of Maine electric consumers. Every time Augusta tells us they have a plan to reduce electric costs, the price goes higher. I am a PE(ret) with several patents in the energy saving industry and a National Energy Award winner from years ago. Energy use has been the focus of my career. Equipment built by my company has been installed in every state and most provinces and countries in this hemisphere and in other countries. I served 5 years on the board of Efficiency Maine Trust. Maine has made a huge mistake in supporting fads and nonsense and this is one of the worst we have seen
