Opposed

I am passionate about doing everything we can to help the environment. We have a hybrid vehicle which gets about 35 to 38 miles per gallon. We have installed heat pumps and a heat pump water heater. These items all make sense.

I am against forcing limited options on vehicles and forcing California EV restrictions on sales. The infrastructure is not here and the technology needs to advance to get better mileage. The demand on the electrical grid will put Mainers in jeopardy, especially during the winter months.

Thank you for listening,

Donna Marciniak
