I am writing to urge you to defeat this proposed ruling. It makes little sense organically but even less sense in Maine.

- 1) Batteries do not perform well in freezing temperatures.
- 2) I traveled with a friend with an electric car once and the charging process took a good 45 minutes before we could move on.
- 3) From what I understand, there is little to no resale value on these vehicles.
- 4) The infrastructure to support electric cars is not available in Maine and so many remote areas.

I want to choose my own vehicle and not be dictated to.

Please put an end to this proposal.

Dori McCormick
