We had a hard awakening this past week in our beautiful state.

I will never want to own an electric car. Absolutely NEVER!!!! If our state is fully dependent on electricity we would be devastated as a state and as individuals.

No electricity brought home the need to remember we live in a state that needs alternative ways to maintain our lives, in our homes, in our stores, on our roads.

I am relieved that our temperatures were warm enough during this storm, that we did not lose lives to the cold. I heard that if you have a heat pump installed in your home with the new laws...that they cut your wires to your furnace so it cannot be used.

You legislators are beginning to make the citizens of Maine ready to think government does not care about who must survive. You make millions on the backs of us Mainers and leave us to fend for ourselves. Thank goodness CMP came up to the line and took responsibility. How many generators did you count that were running and THEN could not get gas to fill them up....why? because the electricity was OUT!!!! NO GAS TO BE HAD.

You all disappoint. Our state can only survive if we take advantage of Oil, Propane, Wood and then as backup....electricity.

I guess you all went to Harvard and think you know more than the rest of us....you do not...listen to the people and shut your mouths for awhile.
