To My Maine Representatives,

I do NOT agree with this at all. To force EVs is wrong. They are expensive. They are not suited for cold climates. We are a rural state. We are not set up with enough charging stations. Electricity is not the answer. Lithium batteries are so expensive to make and replace. You will drive many people into being unable to drive. Motorcycles, scooters, and Amish buggies will be my next transportation choice. Please just understand that we are just hanging on by a thread now. Forcing the public to go green with these ridiculous EV vehicles are NOT helping the environment or anyone's pocketbook.

Sincerely yours,

Elise
