To Whom It May Concern,

Not only do I oppose this rule because I don't want to buy an advanced clean car, I don't think I or anyone else should be forced to. When I expressed the possibility of this happening in our state to some family visiting from elsewhere, both were shocked and had to check it out before believing me. Taking care of all creation is important to me and I choose to care for my gardens and lawn organically and eat organically but think it's wrong for a government agency to force me or anyone to take away our rights to choose what cars we buy.

I also believe it's unwise to depend on electricity to power our cars because of all the power outages we have. I purchased an automatic generator fueled by propane, to keep my basement from flooding and to heat my home when having power outages.

Respectfully,

Elizabeth Deal
