Dear Sirs/Madams,

I am completely against this electric car agenda.

I've lived in Maine most of my life and if you were to say, railroads-sure- busses and mass transport-great-but to force people to agree with a program which clearly has a downside in this state as a result of the weather here wreaks of

a bias against the people of Maine.

Is someone getting some sort of financial benefit from this? Because it surely isn't the people of Maine!

What is going to happen when we can't get an ambulance or a fire truck or a police car to an emergency because its cold out?

Unless public safety is not a priority to this administration- so what is? Clearly it isn't climate change.
