Question or Comment

I am a citizen of this state and I am proud to say that, I am also all about choice and not being told what I can and cannot do. Electric cars are not going to save our environment show me a electrical system that can support this transition and I will gladly give it serious consideration.

I would first mandate where our power comes from to save the environment. You can start with all natural gas and petroleum fired plants before you make the EV's a mandate.
