I believe that this is a really bad idea, we are not California, nothing in Maine is like California. The storm and the loss of power for days should be a wake up call to these people. Rules and laws should not be made by a select few people, if anything this should be put to a vote by the whole state and not have 7 people decide what everyone can buy. As it is California has to shut down power to a lot of people in the summer because there isn't enough power for them. Who is going to pay for all the chargers seeing as a lot of residents in Maine live in apartments, will it be up to the landlord to put these in? A bad idea.
