Dear DEP committee members,
I am writing in opposition of the advanced clean car act.

Maine's infrastructure is not set up, nor can accommodate the necessary services it would need to undertake to allow for EV vehicles in the rural state of Maine, compiled on top of the weather patterns that we receive for more than six months to a time it would make it impossible for Mainers to operate in a affordable, feasible, and conducive way to work with this timeline. Maine should be one of the last States to consider this.

Sincerely
Heather Lewis
