Maine should NOT be held hostage to WEF/etc politics and absurd sanctions. The entire "greenhouse gas" theory is bogus. Maine does not have enough electricity as it stands, and they are proposing to make it even LESS reliable by selling out to BigFakeGreen energy developers. Europe is in a state of crisis and lockdown right now because of FGE policies put in place in the past. There is NO reason Maine needs to follow in these footsteps, other than whatever the governor and other select officials are gaining by it.

DO NOT SUPPORT insanity and future catastrophe by banning our principle modes of transportation!

James Huntsberger.
