For public comment. Regarding the Advanced Clean Cars II Program. This bill is a very bad idea.

We can not run Maine like it is a "sunshine state". As much as I would like to personally own/operate electric vehicles, the technology

has not caught up to where it would need to be for primary use in our State.

I repair tools and equipment for a living, and have first hand knowledge about batteries and various energy storage systems.

Electric vehicles in the State of Maine are still in their novelty phase. Mandating E.V.'s and/or limiting currently used vehicles, is at best, an idea contrived in the poorest of judgement.

At worst, I have to wonder who would be nefariously benefiting from this.

Jason Rogers. Waldoboro
