No mandates on buying electric vehicles! MAINE IS NOT California! Maine is a poor state with many challenges ie. Food prices, high eating bills, and low wages. We cannot afford the high cost of these vehicles and all that comes with them. The electric vehicles have very little benefit to us. It is impractical to expect Maine with its rural areas and the cold winters to install and operate charging stations so electric cars can operate and limiting gas power vehicles. Don't burden Maine people with yet another ill conceived and impractical idea!

Joanne Webb, Denmark, Maine
