Lynne,

I strongly oppose Chapter 127-A. This recent power outages is just one of the many flaws that resulted in the inability to charge any electrical vehicle that would render the vehicle useless in an emergency situation. Also, there would be serious strain on our already unstable power grid that would result in rolling blackouts like California is experiencing now and the fact people can't afford putting food on the table let alone BUY another vehicle just because it is electric!

I would like my tax dollars go towards solving current relative problems NOT ideology agendas that don't help the tax payers that flipping the bill!

Thank you,

John Mancini
