To Whom it May Concern:

I am a resident of Rome Maine. I find this bill to not only be unrealistic, but ignorant! Maine is NOT California (thank God). This is putting the cart before the horse, in typical liberal fashion! Maines climate is not conducive to electric cars as they are now developed. Distances between travel locations are farther and more rural than the left wing capital of the US, upon which you based this bill! Too much, too soon, too fast! Costs will skyrocket even more than they are already due to liberal left wing policies in Maine! Have you not noted the US Automakers have begun to reduce production of these electric cars, because “ nobody wants them”, and “ we over estimated demand! Do not make this monumental mistake and put Maine’s future at risk! We are NOT California and we don’t want to be!

Best,

Keith Henderson, D.O. FACEP
