I oppose this proposed law. No one should be forced to buy anything, let alone an electric vehicle that will increase the cost of living and doing business in this state. Maine is not California and the Maine government should conduct themselves how the people of Maine want. It has been proven that the reliability of electric vehicles in the cold Maine weather leaves much to be desired. The governor and government need to listen to the people of the whole state , not just the people that are living in southern Maine!
