Hello,

I commented before and I shall do so again. This proposed plan for electric cars is bogus and uncalled for. We do not need electric cars and cannot sustain them on our power grid, nor are they practical. My family owns a maple farm in Moose River ME. How are we supposed to plow our two miles of road with an electric car? How are we supposed to get our products to farmers markets, fairs and craft shows all around the state, when the cars can only travel 40 miles before they need charging? In case you didn't know it's 75 miles from Moose River to Skowhegan and almost 100 miles to get to Augusta. This is so impractical. Why stop here, why not make us all go to horse and buggies? We do not need to follow California.

Keep this up and you are going to "drive" the Good honest tax paying citizens of Maine to relocate to a better State.

NO NO NO!
