I am sending this communication in full opposition to the proposed rule. It is not hard to see that the majority of support for this proposed rule is from groups and individuals who will profit from this foolishness. The long list of opposition is from people and groups that have to exist in the real world and will face the real-world consequences of this drivel. We have seen firsthand how the grid and battery infrastructure are not up to the task of cold weather. Without the EPA ratings boost allowed to manufacturers, the EV industry would not exist. You have been elected to represent the interests of the Maine people, not lobbyists or special interest groups. I encourage each one of you to do the right thing and vote against this bill.
