To Whom it may concern,

Maine is not California, no one that is actually from Maine (not moved here ) wants this state to adapt ANY laws or rules California has. The majority of Maine is rural we all want to keep it that way. This bill is dangerous and just feeds lies of climate change, you cannot make an argument that electric vehicles will help climate change.

You people have DESTROYED Portland by continuously making decisions based on what out of state wants. All this bill is another draw to city people.

California has had nothing but problems with not enough infrastructure for electric vehicles including full power brown outs. The bill makes no sense for Maine.
