I am strongly opposed to adopting this rule. As a retiree, we have limited ourselves to one vehicle. we live in a condo association with no access to charging stations and no plans to install any. Eva's are very expensive for us to purchase and maintain. In addition, we are very concerned about the limited range and operational ability of an EV in cold and snowy weather. Keep our options open and let us decide if, when, and how we might choose to switch to an EV, if ever. Please reject this program for adoption.
