This proposal makes no sense and is unfair to lower, and medium income, Mainers. The implementation of this plan will burden our citizens with expensive, limited range vehicles. In addition, there is no reliable charging network, especially in rural areas. Another consideration is tax collection..... taxes collected for road maintenance (from petroleum sales) will plummet.

A monumental change of this nature should be voted on by the general public, not mandated by partisans. What happened to choice and the voice of the people?
