To our Legislatures, Please oppose this 127-A Advanced Clean Car II. (Reposting). It is not feasible nor is it affordable for most Mainers to buy an electric car. I don't even own a car! This doesn't make sense when already our power grids being overworked, and especially when our power goes out we are up a creek without a paddle. There are children who are work as slaves who are having a part in making these lithium batteries for these electric cars. Plus I am concerned about the people who deliver our gas to the pumps will lose their jobs. Please reconsider this whole bill and please vote NO in opposition. Thank you for your time and for your consideration. Ranma Robinson
