There is nothing clean or green about electric cars. The energy it takes to charge them is simply out of sight and out of mind. Because you can't see it, doesn't mean it isn't there.

Beyond that, it is completely irresponsible, impractical, and absolutely undemocratic to do this and you know it. Your utopian agenda seems to have caused you to completely lose your minds, that is unless of course mandating EV's is only yet another means of control over the citizens of Maine.

The people of this State do not want it, nor can they afford it. They are increasingly seeing right through the whole word game being played concerning the EV cars, as well as the (intermittent) wind and solar "power" we are being forced to subsidise.

You prey on those who are either too busy trying to make ends meet to pay attention to your antics, or have been propagandized by the complicit media.

It appears the agenda driven Democrats don't give a hoot about the wellbeing of Maine people.

Please come to your senses and quit acting like fascist totalitarians.
