We strongly oppose this move to EV's being forced on the people of Maine. We can not afford an EV nor the probable cost increase to combustion vehicles and the parts needed to fix them as a result of this, if it were enacted. We know many people who would suffer dramatically as a result of this!! We have some important questions such as:

what does the state have planned for the disposal of these toxic metals, etc?

where are they being bought from?

who is actually benefiting from this?

what are we going to do when it is too cold to even drive them?
