Dear Sir or Madam,

I am writing in total opposition to 06-096 127-A as proposed. This rule to adopt vehicle emission standards that are more stringent than federal standards is clearly not attainable, affordable or even reasonable to the average Maine citizen.

While the Natural Resources Council of Maine may feel they have the right to try and legislate Maine citizens into EV's, I feel we must have a choice in this matter. Especially considering the fact that the infrastructure (charging stations) is still not available statewide for the EV models. Other considerations that are not being discussed are the energy needs for charging EV's, the fact that an EV does not stay charged as long in colder climates and that the average Maine citizen cannot afford the current cost of an EV.

I respectfully request my letter be recorded in opposition to this legislation.
