I am writing to comment on the proposed EV Legislation before the legislature. I would strongly advise against approving the CA mandate because the current technology and infrastructure would not be able to support such a bill. During this past winter, we have heard the horror stories of people with electric vehicles who have been unable to charge there EVs in cold weather and have experienced reduced driving range because of the cold. It is irresponsible to mandate something that can never be achieved. For this reason, I advise a no vote on the proposed legislation.
