Electric Cars

I am car shopping now because I need a new car.

I can't afford a hybrid or all electric.

My husband and I both work but I can't go broke on electric.

The thought that a few people think they speak for us all and can dictate what I spend my money on is outrageous. I retire in less than 2 years and wouldn't even be able to afford to replace the batteries in one of these.

You say this will bring 0 emissions? There is no such thing. What is the cost to pay China to dig the minerals in their country to build these batteries? Slave type labor in these communist countries isn't 0 emissions. It takes natural gas to even create electricity. How do you think these electric cars are making out in families with days of no power right now?

We realize that you and the Mills team are trying to destroy this state.

And not that you care because we know you don't, my husband and I will be moving to a friendly state in 2 years. My family help found a town in this state so we have been here since the beginning. We don't want to leave but your ludicrous ideas are forcing us to. Please don't vote yes. We are begging you to STOP and do the right thing here.
