Vote NO on chapter 127-A. It's bad for Maine and its citizens and overall bad for the environment. Manufacturing and disposal of EV's and there components is worse for the environment than what we have now and much more costly. We are mostly a rural State. They have limited range and long recharging time. The batteries are toxic and expensive to replace. Also consider the disposal issues we will face with all those dead batteries.

Sounds good but the bill will be devastating to everyone.
