The California program is unnecessary and unwarranted. It accomplishes nothing more than continuing the backward movement of our state and Nation. EV's will have their day and time in the distant but not near future as is proposed. The cost of the EV to the average individual (of which Maine is primarily made up of) is totally prohibitive. Further a state like Maine which is more rural then metropolitan is not welcoming to EV vehicles at all. Please turn down any idea of putting the California rule in place.

Thank You

Thomas Shedlarski
