Where's the common sense. As of today 12/24/2023 nobody living in Fort Kent has been able to tell me or show me that an electric vehicle is very practical in Fort Kent. There are a few around mostly well off folks that come work at the hospital and from the stories they tell nobody up this way would ever consider using one even if it was given to us. There is not one reason that I know of yet that would get me to trade my everyday work horse of personal vehicle for a free one of these electric vehicles. Quite a statement. You probably thinking wow this Tony guy must be right wing idiot that wasn't gifted with much of a brain from day one. Look me up and you will be pleasantly surprised. Also look up the statement about one reason it would make sense for me to accept a free electric vehicle as a main vehicle at this time. You will be unpleasantly surprised there are none and our government wants to force these on us. Wow. Thank you if you took the time to read this message all the way through and have a Merry Christmas. Tony Theriault. Fort Kent public works director. 64 year member of the surviving in northern Maine club.
