PLEASE stop this nonsense. EV's are NOT green nor sustainable, particularly in Maine's harsh climate. Every day brings more and more evidence that they are NOT the planet saving option being touted by the EV manufacturers. Most Mainers neither want nor can afford to help destroy more and more of our planet by open pit and strip mining and landfills being filled with these discarded vehicles and batteries. It is especially ironic that the vote was delayed by one of our powerful storms that knocked power out over a large portion of our state, rendering EV's useless . . .
