This bill needs to go there should be no requirements for the Dep no longer has credibility with maine as they remove hydro dams for the last 20 years destroyed fresh water fishing and reducing our power putting us in the predicament. EV's destroy the earth takes more resources to build and the environmental damage that occurs has a huge foot print is higher from the build to the use to the disposal. Now creating more environmental problems with solar and wind. It will destroy the environment in 30 to 40 years you will have a a lot of hazardous waste that makes land unusable. Batteries do not last in the cold. I believe you folks need to rethink this. I talked to a car salesman in Augusta states hasn't seen a customer in 3 days. Most of us are now going south to buy our vehicles and rebuilding a complete old one as it is a cheaper more reliable vehicle and I don't have to keep a generator in the back in case I run out of batteries we are seeing this everywhere.
