In regard to the proposed program, I want to express my opposition to it. This is totally unnecessary in the state of Maine. Also, this will impose a significant burden on the people of the state (which is decades away from being able to support an infrastructure to make this proposal even viable).

I read these bills and proposals and I wonder if anyone has ever taken any science courses or worked with scientists in the fields they are trying to regulate.

I hope you come to realize these EVs are not “green” because of various processes that are caused by the battery systems.

Thank you,

William Wildes
